BIO

A new media artist from Chiayi, Taiwan.

His work spans interdisciplinary art and audiovisual performance, built around sound experimentation, real-time image generation, and digital signal integration.

At its core, his practice focuses on human relationships, using the distortion that occurs as digital signals are transmitted to explore cognitive differences in visual observation.

He is actively engaged across interdisciplinary art, theater, dance, and sound installation, continually expanding the possibilities of new media art.

He has taken part in exhibitions and performances including *Dream Percept* at C-LAB, FUTURE VISION LAB, *Whisper* at the Kuan Du Light Art Festival, and *Glub Glub* at Nuit Blanche Taipei.

EDUCATION

Taipei National University of Arts — Department of New Media Art
